

FAT REDUCTION RESEARCH STUDY

Are you tired of those fat deposits?

Sadick Research Group is looking for healthy women who are at least 18 years old and who have visible fat deposits on their outer thighs (commonly called saddle bags). Eligible participants will be treated with an investigational device.

- Requires 8 treatment visits in 4 weeks
- Requires an additional 3 visits over 12 weeks
- Must be in good health and not obese to be considered for participation

For more information call 212-710-9849 (Margaret) or 212-710-9855 (Elaine)

This study is being conducted by Sadick Research Group, 911 Park Avenue, Suite 1A, New York, NY 10075.
